Why Secure Returns ?

The Accounting Profession is currently facing many challenges including:

1. Time - finding enough hours in the day to adequately service your clients…..

2. Technology – keeping up to date with technology while your clients are becoming technologically advanced and doing increasingly more business on the internet…..

Secure Returns

Secure… Efficient… Convenient

What is the Concept?

- A secure website where your clients can download their tax returns or other documentation, or upload MYOB files, BAS or other information

- Each client will be logging in to a secure area, where they can see **only their own documents**

- **Simple** to setup & to administer

- **Quick** to upload

- **Low** upfront cost

- Does **not** require any hardware

- **Pay as you use**

- Documents are backed up and **available 24/7**

Secure Returns

Secure… Efficient… Convenient

It only takes a minute

Set up a client on the system an email automatically sent to your client with Password & login

(20 Secs)

You upload a file to the folder

(25 Secs)

An email is instantly & automatically sent to your client with the link to the file

(Automatic)

You create a Secure folder for your client on the site

(10 Secs)

You release the folder

(5 Secs)

Your client logs in & downloads the file

Secure
Returns

Secure… Efficient… Convenient

What is wrong with what I do today?

- Post
  - expensive - have you ever costed the time it takes to print, address, & post a tax return?
- Email
  - email is notoriously unsafe for private data
  - many tax returns are too big and have to be broken up into multiple emails
  - Can be time consuming, therefore expensive

- General
  - how many times a year do clients ask for a copies of tax returns for the Bank etc?

How safe is my data?

- Your client's data is stored on a server in Sydney
- Bank type security levels
- Due to the high level of security used, the servers are significantly more protected from attack than your server in your office.
- 4 layers of security:
  - Application Security
  - Server Security
  - Data Security
  - Physical Security

Secure Returns

Secure… Efficient… Convenient

How safe is my data?

- ## Application Security
  - 100% encrypted communications between all layers of the solution

- ## Server Security
  - Located in a secure data centre and all information on the servers is encrypted and non-recoverable in the event of theft or loss

- ## Data Security
  - Stored on encrypted disk volumes, on encrypted databases

- ## Physical Security
  - Biometric access data centre is manned 24x7 by security staff
